

LISTING OF CLAIMS

1 (Currently Amended). A finger thinking educational tool comprising a finger-tip encirclement worn on a finger of a user's hand when writing or studying, having a rubbing surface positioned thereon on said encirclement to be rubbed ~~between by~~ at least ~~two~~ one of the other fingers of the hand in recalling educational material previously learned, wherein said rubbing surface includes a discernible point of attention to be focused upon by the user when rubbing in recall, wherein said encirclement is sized to be worn to overlie substantially only the end-most phalange of the user's finger, and wherein said encirclement is constrained to be fixed in non-rotative position on said finger so that said discernible point of attention can be easily focused upon by the user when rubbing.

2 (Original). The finger thinking educational tool of Claim 1 wherein said finger-tip encirclement is worn on one of the index, middle, ring and little fingers of the hand.

3 (Original). The finger thinking educational tool of Claim 1 wherein said finger-tip encirclement is worn on the thumb of the hand.

4 (Original). The finger thinking educational tool of Claim 1 wherein said finger-tip encirclement is composed of a durable soft fabric.

1 5 (Original). The finger thinking educational tool of Claim
2 1 wherein said finger-tip encirclement is composed of a durable
3 soft flexible fabric placeable on a finger of the hand by a
4 pinching of opposite sides thereof.

1 6 (Original). The finger thinking educational tool of Claim
2 5 wherein said finger-tip encirclement is composed of a leather-
3 like fabric.

1 7 (Original). The finger thinking educational tool of Claim
2 6 wherein said finger-tip encirclement is composed of one of a
3 natural and brown colored leather.

1 8. (Cancel Claim 8.)

1 9 (Original). The finger thinking educational tool of Claim
2 1 wherein said surface includes a discernible point of attention
3 focus smooth to a tapping or rotational touch.

1 10 (Currently Amended). The finger thinking educational
2 tool of Claim 9 wherein said discernible point of attention
3 focus includes a magnetic insert.

1 11 (Currently Amended). The finger thinking educational
2 tool of Claim 9 wherein said discernible point of attention
3 focus includes a magnetic insert of ~~small~~ flat, substantially
4 orthogonal screen appearance.

1 12 (Original). The finger thinking educational tool of
2 Claim 10 wherein said discernible point of attention focus
3 includes a magnetic insert of minimal strength.

1 13 (Original). The finger thinking educational tool of
2 Claim 10 wherein said discernible point of attention focus
3 includes a magnetic insert of minimal strength facing inwardly
4 towards the palm of the user's hand.

1 14 (Currently Amended). A finger thinking educational tool
2 comprising a finger-tip encirclement worn on one of the index,
3 middle, ring and little fingers of a user's hand when writing or
4 studying, having a magnetic rubbing surface positioned thereon
5 to be rubbed between the thumb and said one finger of the hand
6 in recalling educational material previously learned- wherein
7 said encirclement is sized to be worn to overlies substantially
8 only the end-most phalange of the user's finger and wherein said
9 encirclement is constrained to be fixed in non-rotative position
10 on the finger so that said magnetic surface can be easily
11 focused upon by the user when rubbing.

1 15 (Original). The finger thinking educational tool of
2 Claim 14 wherein said finger-tip encirclement is composed of a
3 soft flexible fiber on which said magnetic surface is
4 permanently affixed adjacent the finger-tip thereof, inwardly
5 facing the palm of the user's hand.

1 16 (Currently Amended). The finger thinking educational
2 tool of Claim 14 wherein said magnetic surface is of a black
3 ~~screen~~ substantially orthogonal appearance.

1 17 (Original). The finger thinking educational tool of
2 Claim 16 wherein said finger-tip encirclement is composed of a
3 leather-like fabric of brown or natural color.

1 18 (Currently Amended). A finger thinking educational tool
2 comprising a finger-tip encirclement worn on one of the fingers
3 of a school-age child's hand when writing or studying, having a
4 magnetic rubbing surface positioned thereon to be rubbed with
5 the thumb of the hand in recalling educational material
6 previously learned- , wherein said encirclement is sized to be
7 worn to overlie substantially only the end-most phalange of the
8 child's finger, and wherein said encirclement is constrained to
9 be fixed in non-rotative position so that said magnetic surface
10 can be easily focused upon by the child when rubbing.

1 19 (Original). The finger thinking educational tool of
2 claim 18 wherein said finger-tip encirclement is worn on one of
3 the index, middle, ring and little fingers of a school-age
4 child's non-dominant hand.

1 20 (Original). A finger thinking educational tool of Claim
2 18 wherein said finger-tip encirclement is worn on the thumb of

3 a school-age child's non-dominant hand.
